LAKES GO DIGITAL

FINAL SEMINAR

From Data to Decisions:
How Can Smart Buoys Be Used in Lake Management?

Over two days, we will explore the project's main results, gain hands-on experience using the real-time data platform, and learn how these data can support informed decisions on lake management in your municipality.

3–4 November 2026

Liepaja, Latvia

- Real-time monitoring
- Data interpretation and hands-on experience
- Smart buoy maintenance, calibration and winterisation
- Knowledge exchange and discussions with experts
- Nature-based solutions in the Baltic region

EXPERTS FROM:

- Latvian Institute of Aquatic Ecology (LIAE)
- Institute of Food Safety, Animal Health and Environment (BIOR)
- Mykolas Romeris University (Lithuania)
- Project partner organisations and other institutions

PRACTICAL INFORMATION

Catering: Full catering will be provided to all registered participants on both seminar days.

Accommodation: Paid accommodation will be provided for all registered participants for the night of 3–4 November. Accommodation for the preceding night (2–3 November) is available for participants whose one-way journey takes five hours or more.

Please bring a laptop for the practical session on using the data platform.

The Lakes Go Digital project is implemented with co-funding from the Interreg VI-A Latvia–Lithuania Programme 2021–2027.
